Underneath the title, there is a field labeled "For the course:" followed by "Course Name" and a "Back to Course" button. The main content area is titled "Vignette Assumption" and contains the following text:

When completing the vignettes, there is a vignette assumption. That is, when reading assume that a full assessment has been done and no mention means 'no evidence'. This is the standard quality assurance if it is not documented it does not exist assumption. What that means, then if there is no mention of a need, the rating should be a '0'. If there is no mention of a strength, then the rating should be a '3'. So, no mention of any suicidality would result in a rating of '0' on Suicide Risk. No mention of any talents or interests would result in a rating of '3' on Talents/Interests.

Another way to think about it is that you start the assessment with all 0 ratings on the Needs and all 3 ratings on the Child/Youth Strength and then you look for evidence to adjust your scores accordingly using the action levels. Caregiver ratings use the Need action levels for the vignettes.

Ordinarily certain items would have an N/A option (for example Job Functioning for an underage child, or Foster Caregiver for a child not in foster care). For the purposes of this test please rate such items as '0' for needs and as '3' for strengths.

Good luck!

At the bottom of the page, there is a blue button labeled "Start Vignette" with a black arrow pointing to it from the right.
